

To shop for eTextbooks from BJU you will use their Parent Portal to create an account and order your own eTextbooks following these steps:

Step 1: Locate the student's grade level and open the link to the ebooks available (below).

Step 2: The link will open to a prefilled cart of **all ebooks available to that grade**. If you need all of the selected ebooks, you don't need to do anything else, they are in your cart. If you do not need all the books, simply uncheck the book(s) you don't need. Please check/modify the cart to order books according to your student's schedule.

Step 3: If you have additional students, click on each applicable grade level link to add more items to your cart.

Step 4: When you are prepared to check out for the first time, you will need to sign up for a new account.

When you order through the Parent Portal you will receive a **10% discount** off the retail price using the **code PPP10**.

After you make your purchase, you can log back in to your BJU account to find the code for the ebook. BJU states the code should be available within 30 minutes after making your purchase.
